### **MASTERS ELECTRONICS / IT SPECIALIST**

**JAN 2014 - JAN 2018, KAMPALA, UGANDA**

**MASTERS ELECTRONICS was the leading dealer in all local and imported electronics like musical gadgets like , guitars, pianos, speakers, amplifiers, crossovers, microphones, and all the latest sound systems.**

#### **Roles:**

**Install and configure network, manage database, provide user support, manage information security, troubleshooting systems and software. Among others.**

## **Other PROFESSIONAL EXPERIENCE**

### **Software Engineering Immersive, 2020 - Present**

Developed several mobile first web-applications and built several user-friendly websites including my react portfolio using React.js, JavaScript, and several other programming languages, libraries, and frameworks for-example react, angular, bootstrap, JavaScript, html, css, node among others.

### **Noted projects**

-Created an interactive Connect Chore app that helps users manage household chores hence maintain proper hygiene in a home; used HTML, CSS, and JS React.

-Created an interactive Geo-battle application where users can create their own customized player who can then battle Florida Man villain. The user will attempt to score the most points and compare their score to their friends to see who the best Geo-battler is! In the app, users will be given a set amount of point and must choose wisely how to create their player.

-I have also collaborated with several other senior software engineer assisting them throughout multiple projects as a freelancer while working my way to a successfully developing my skills as a software engineer.
